Course Description:

In Social Studies 10, students will be introduced to a collaborative inquiry class where we examine, contextualize, analyze and reflect on the major historical social phenomenon that have transformed the current state of Canadian national identity in the 21st century. Canada has adapted and responded to many of the major diplomatic, social and political global events in the modern era. As a result, Canada's participation in the world's events (since WWI) becomes the major subject matter of Social Studies 10.

Specifically, students will connect to Canada's dark colonial heritage through First Peoples Principles of Learning, critically analyzing historical social trends (such as that of the injustices committed against First Peoples) to understand how learning is embedded in history, memory and story. As a result, this course will further examine current social and global patterns by comparing them to historical events where injustices have been committed, while simultaneously questioning the truth of the perspectives that these recorded events have been constructed from. Lastly, students will excel in this class if they are responsive, open and thoughtful towards engagement in discussion and critical analysis of major topics that challenge their own personally held beliefs.
